### From the Board

At the meeting held last Thursday night no business was transacted because we were seven members short of a quorum. The Board did put forward the case for Project Rethink and sought comments from the members present. A show of hands had a large majority of those present in favour of the project.

To formalize the implementation of Project Synthetic, a further Special General Meeting has been called for Friday 29<sup>th</sup> October, 2021, at 4.45pm in the Clubrooms. The exceptional circumstances around the short notice, is the need to have everything in place when the installers are permitted to travel from Australia.

Please be aware that "Project Rethink" will only go ahead if we can raise \$150,000. If you are interest in contributing in some way, please complete the form (from the desk next to the raffle desk) and pass to myself or Denise in the office. Please note that Denise and myself will be the only people in the Club who will be aware of your proposed contribution.

Please do not hesitate to talk to myself, or any of the Board members, if you have any queries

At the Board Meeting held on Thursday 21<sup>st</sup> October, the Board resolved that in the interest of Health & Safety of all members everyone entering the Club should be double-vaccinated against Covid-19. Any members who are unsure about the vaccine are asked to contact any of the Board members, which will be held in strict confidence.

And a reminder that everyone entering the rooms is required to sign in, either by using the Covid-19 app or by completing the form at the front door.

### Looking to the Future

The club is about to make a substantial investment in two new artificial greens. To assist with their longevity the installer has provided a manual on looking after the greens.

Given that the Board has some concerns around footwear and dumping, and to allow for people to change, notice is given that the Board, through the Match Committee, will be assessing those players deemed to be dumping or with incorrect footwear. Those players will then be approached and asked to modify their footwear, or would be offered coaching/assistance to modify their delivery style

### Extract from Care of Artificial Green provided by Berry Services

#### Preventative Care

Should you follow the forgoing recommendations, you will dramatically reduce the overall maintenance schedule requirement of your green and provide a surface of a more even texture for greater playability.

- At all times only approved footwear should be allowed on the surface.
- Clean your shoes before entry into the green
- Ensure that no food or drink is allowed on the green surface
- Smoking on the green is prohibited

#### Dumping of Bowls

Over time, clubs sometime overlook the very valuable and costly asset in the form of their synthetic surface bowling green. It is easy to take it for granted.

One area of concern is the dilemma with potential damage created by "dumpers". Usually, it is the less young bowlers, often long-serving members of the club who are not as readily able to bend to deliver the bowl appropriately. Thus, club management can have a difficulty balancing respect for such members with regard for the longevity and performance of the green

Damage from "dumping" can manifest itself by:

- Bruising of the surface
- Deforming the surface
- Deforming the surface material in the base

## Dumping of Bowls continued ~

The “odd dump” may not cause any obvious defect but over time certain areas of the green will become suspect – and difficult to rectify.

- Invite those with a “dumping” problem to receive guidance and coaching
- Introduce the possibility of using a “bowling arm”
- Use a dumping mat laid out in the zone of the “dump” contact
- Restrict players from using the green (hardly a good result for a long-term member with a notable history of service to the Club)

## Umpires Corner

### QUESTION

Pair “A” are losing 18-16 after the 20<sup>th</sup> end. They score two shots on the last end to tie the scores. Who delivers the jack on the extra end?

## Answer

The skips should toss a coin to decide. The winner of the toss can choose whether to place the mat and deliver the jack and the first bowl or tell the opponents to place the mat and deliver the jack and the first bowl

### *Special General Meeting*

Friday 29<sup>th</sup> October @ 4.45pm

@ The Bowls Matua Clubrooms

#### **The purpose of this meeting is to discuss Project Rethink**

#### **Project Rethink**

The delay in Project Synthetic has presented a significant opportunity for Bowls Matua.

The original vision for Project Synthetic was for Greens 1 and 2 to be converted to synthetic and to leave Green 3 resurfacing to the medium term. The Club went to the funders and found that we could not raise the \$500,000 plus required. So, our plan B was for Greens 2 and 3 to be resurfaced. This amounted to approximately \$390,000 including a contribution of \$150,000 of Club money.

The Club has approached our contractor to update the costings to convert Greens 1 and 2 to synthetic, leaving Green 3 for at least another 5 years before the need to replace the surface. As you will see from the costings below, we need to raise around \$150,000 for Project Rethink in addition to the Club contribution of \$150,000, either by donations or by borrowings.

The plan is to dedicate Green 3 to our external event clients, and set aside an amount each year from this source of revenue to replace its surface in the medium term.

**The Board of Bowls Matua unanimously recommends Project Rethink** which comes with risks, but the benefits outweigh the risks.

#### **The risks are:**

- 1) The Club does not need an extra synthetic green and there may be other uses that Green 1 could be put to that might generate an income.
- 2) The Club would need to get the blessing of our existing funders. All funds have been expended and TECT has been advised of our plans and is satisfied that their final contribution has been consumed in the funding of one green (this was their stated position in providing the grant in the first place).
- 3) The Club cannot repay the loans within 10 years after allowing for the sinking fund contribution.
- 4) If the Club waits to decide what we do with Green 1, the costs to convert Green 1 to synthetic at some stage in the future may increase much more.

#### **The benefits are:**

- 1) The Club will have two greens that are more likely to run at similar speeds. The danger is that Green 3 and Green 2 may not run at similar speeds due to the fact that Green 3 is more compacted than Green 2.
- 2) The Club can run our events on two adjacent greens which makes for better viewing.
- 3) The Club can focus Green 3 for corporate events and minimise damage to a new synthetic.
- 4) The Club will utilise existing shed structures around Greens 1 and 2.
- 5) The Club already has the drainage in place alongside Greens 1 and 2 and this is connected to the stormwater system.
- 6) The Club will establish a signal that Bowls Matua is seeking growth and has the green capacity.
- 7) The Club will achieve savings in completing both greens together.

To proceed with Project Rethink the Club will need to seek the required funds from members as follows:

- 1) You are prepared to make a donation of any amount (which may be eligible for a tax rebate);
- 2) You are prepared to make an interest-free loan to the Club in blocks of \$5,000;
- 3) You are prepared to make an interest-bearing loan to the Club in blocks of \$5,000.

Annual capital repayments for loans will start on 31<sup>st</sup> March 2023, subject to available finance, and will be fully repaid within 10 years. The repayments will be funded from savings due to not having to pay for a greenkeeper.
